

ILLINOIS ANOTHER GREAT DAY IN MEMPHIS' GREATEST STORE

FOR PNEUMONIA

SPRINGFIELD, Ill., Nov. 19.—Illinois health authorities are preparing for a serious pneumonia epidemic (between May and the end of January) and the end of the influenza season. According to the state director of health, who said the influenza epidemic could be expected to follow in the wake of the pneumonia epidemic. "As a means of combating this pneumonia epidemic," Dr. Drake said, "we are advising all local health officers to increase in every way possible the efficiency of their services. We are of literature instructing people how to take care of themselves to avoid pneumonia, and emphasizing the need for adequate ventilation of the influenza, which is expected to continue all winter and which increases the susceptibility to pneumonia."

In addition to these things, attention is being given by the state department to the manufacture and use of the pneumococcus vaccine which is being freely employed by the surgeons-general of the army among soldiers and is believed by many to have proved its efficacy as a pneumonia preventive.

Martin Dupre, chief bacteriologist of the state department of health, is making a study of the preventive vaccine at Washington, New York, Boston and other Eastern cities and will bring back to Illinois from New England, where the influenza epidemic was especially severe, the conclusions of specialists there.

Only a very few treatments of the pneumonia preventive vaccine have been procurable in Illinois until now, Dr. Drake stated. Recurrences of "sporadic influenza outbreaks" may be expected in Illinois throughout the winter, Dr. Drake said. "Infection is still in the state, and only eternal vigilance can stamp out influenza," he declared. "There is a deplorable tendency on the part of the public to let down the safeguards as soon as quarantine is lifted. Instead of this, there should be redoubled effort to prevent any relaxation of sanitary measures."

Spanish influenza, or "three-day fever," as it has sometimes been called, according to Dr. Drake, has a tendency to come in three successive waves. By some it is argued, he added, that the present epidemic is the second wave, the first having crossed the country last spring, while there were said to be an unusually large number of pneumonia cases, superinduced, it is supposed, by an influenza outbreak.

Reports that a new and distinct influenza outbreak was sweeping Europe and that it will in a few weeks reach the eastern coast of the United States were discounted by Dr. Drake. "The infection is here now," he said. "Whenever preventive measures and necessary precautions are omitted influenza will appear again and in epidemic form."

AMERICAN CAPITAL CAUSING CONCERN AMONG BOLIVIAN

LA PAZ, Bolivia, Nov. 19.—(Correspondence of the Associated Press.)—Index of American capital into the central republics of South America for the development of vast areas of hitherto untouched resources has caused Bolivia and Paraguay to awaken to a realization of the possibilities that lie in the disputed zone which is known as the Great Chaco.

The boundary line between these two republics never has been fixed definitely because of the wilderness of the country, but both nations have been satisfied with going on record as claiming all the zone and then going about their daily business without forcing the issue.

But now that great development companies from the United States are seeking concessions, the newspapers and public men are urging that the old question be brought up for final settlement.

The Great Chaco is a vast area north of Argentina between the Piconayo and Paraguay rivers. It is claimed by both Bolivia and Paraguay, though both admit that their claims are so large that they will have to give up large areas in the final reckoning.

For several years Bolivia has been preparing quietly for the day of final settlement, so that it is now in a position to press the issue to advantage. That country has constructed a chain of forts at intervals of 20 miles, in direct wireless communication with La Paz, put its army in possession of the strip and settled back to wait for the argument which now appears to be approaching.

BRITISH HOSPITALS TREAT MANY PATIENTS

NEW YORK, Nov. 19.—Hospital in Great Britain and Ireland have treated 2,291,219 British and Indian troops and German prisoners wounded in the various theaters of war, restoring many thousands to health and losing less than a dozen by accidents in transportation, the British bureau of information has announced here in a review of the United Kingdom's medical, agricultural and nursing work during more than 31 months of war.

Attending to the comfort of the wounded "from the moment they became casualties," the statement said, the British medical service gave brilliant results in a tremendous task and brought millions of men into England by hospital ships and ambulance trains with the least possible delay and suffering. Among the wounded treated in the British Isles, it was said, were 41,413 German officers and men who were attended with care "in striking contrast to the treatment meted out to allied wounded prisoners in German hands."

Wounded British (including only part of the total casualties of the class) treated in the United Kingdom since August, 1914, are summarized as follows: From France, 1,224,000; from Italy, 273,000; from the Mediterranean, 1,144,000;
